

What are the Different Shelves and Cards Available in Tableau?

Ans:

Tableau provides various **shelves** and **cards** that help users create and customize visualizations. These components make it easy to organize data and design interactive dashboards.

Shelves in Tableau

1. Columns Shelf

- Used to place fields that define the horizontal axis of a visualization.
- Creates columns based on the selected field.

Example: Month-wise sales trend.

2. Rows Shelf

- Used to place fields that define the vertical axis.
- Creates rows based on the selected field.

Example: Department-wise patient count.

3. Filters Shelf

- Used to filter data and display only relevant information.
- Helps users focus on specific data subsets.

Example: Show data only for Cardiology department.

4. Marks Shelf

- Controls how data is displayed in the visualization.
- Includes options such as Color, Size, Label, Detail, Tooltip, and Shape.

5. Pages Shelf

- Breaks visualizations into separate pages based on a field.
- Useful for showing changes over time.

6. Measure Values Shelf

- Displays multiple measures in a single view.

7. Measure Names Shelf

- Used with Measure Values to display multiple measures together.

Cards in Tableau

1. Marks Card

The most important card in Tableau. It contains:

- **Color** – Changes color of marks.
- **Size** – Adjusts mark size.
- **Label** – Displays values or text labels.
- **Detail** – Adds additional detail to the view.
- **Tooltip** – Shows information when hovering over marks.
- **Shape** – Changes the shape of marks.

2. Filters Card

- Displays active filters applied to the worksheet.
- Allows users to interactively filter data.

3. Pages Card

- Used for page-by-page data analysis and animation.

4. Legends Cards

- **Color Legend**
- **Size Legend**
- **Shape Legend**
- **Summary Table**

Shelves	Purpose
Columns	Creates horizontal axis
Rows	Creates vertical axis
Filters	Filters data
Marks	Controls appearance of marks
Pages	Displays data page by page
Measure Values	Shows multiple measures
Measure Names	Identifies measures

Cards	Purpose
Marks Card	Controls color, size, label, tooltip, shape
Filters Card	Displays filters
Pages Card	Enables page navigation
Legend Cards	Explain colors, sizes, and shapes
