

# 1. Apply Blend and Join for Customer, Customer Order, Product details sheet to display Customer ID, Order ID, Product ID, Product Name without any data loss and \*.

## Dataset:

1. Customer : <https://itv-contentbucket.s3.ap-south-1.amazonaws.com/Exams/Tableau/Customer.xlsx>
2. Customer Order : <https://itv-contentbucket.s3.ap-south-1.amazonaws.com/Exams/Tableau/Customer+Order.xlsx>
3. Product : <https://itv-contentbucket.s3.ap-south-1.amazonaws.com/Exams/Tableau/Product.xlsx>

## Ans:

### 1. Join

The screenshot shows the Tableau interface with three data sources connected: Customer, Customer Order, and Product. The relationship is visualized as a join. The 'Product' data source is selected, showing 4 fields and 10 rows. The 'Fields' pane on the left lists the fields for each data source: Customer (Product ID, Category, Sub Category, Product Name), Customer Order (Product ID, Order ID), and Product (Product ID, Category, Sub Category, Product Name). The 'Columns' shelf contains the fields: Product ID (Product), Category, Sub Category, and Product Name. The 'Rows' shelf is empty. The 'Marks' shelf is set to 'Automatic'.

| Product ID (Product) | Category        | Sub Category | Product Name       |
|----------------------|-----------------|--------------|--------------------|
| PD202011             | Furniture       | Bookcase     | Story Bookcase     |
| PD202012             | Furniture       | Chair        | Rotating Chair     |
| PD202013             | Office supplies | Labels       | Name Labels        |
| PD202014             | Furniture       | Tables       | Laptop Tables      |
| PD202015             | Office supplies | Storage      | File Storage       |
| PD202016             | Furniture       | Furnishing   | Kitchen Furnishing |
| PD202017             | Office supplies | Art          | Fine Art           |
| PD202018             | Technology      | Phone        | Smart Phone        |
| PD202019             | Office supplies | Binders      | Binders            |

### 2. Output Columns

The screenshot shows the Tableau interface with the join relationship between Customer, Customer Order, and Product datasets. The 'Columns' shelf contains the fields: Customer ID, Order ID, Product ID, and Product Name. The 'Rows' shelf is empty. The 'Marks' shelf is set to 'Automatic'. The 'Columns' shelf is also labeled 'Customer ID', 'Order ID', 'Product ID', and 'Product Name'. The 'Rows' shelf is empty. The 'Marks' shelf is set to 'Automatic'. The 'Columns' shelf is also labeled 'Customer ID', 'Order ID', 'Product ID', and 'Product Name'. The 'Rows' shelf is empty. The 'Marks' shelf is set to 'Automatic'.

| Customer ID | Order ID | Product ID | Product Name       |
|-------------|----------|------------|--------------------|
| Customer01  | OI101134 | PD202011   | Story Bookcase     |
| Customer02  | OI101135 | PD202012   | Rotating Chair     |
| Customer03  | OI101136 | PD202013   | Name Labels        |
| Customer04  | OI101137 | PD202014   | Laptop Tables      |
|             | OI101138 | PD202015   | File Storage       |
|             | OI101139 | PD202016   | Kitchen Furnishing |
|             | OI101140 | PD202017   | Fine Art           |
|             | OI101141 | PD202018   | Smart Phone        |
|             | OI101142 | PD202019   | Binders            |
|             | OI101143 | PD202020   | Home Appliances    |
